

Metric	Value	Basis	Status
Read window	80 ns	testbench transient/integration window	configured
Array size	128 x 128	generated crossbar instance	configured
Carrier count	4	configured carrier set	configured
Operations per window	131072	128 rows x 128 columns x 4 carriers x multiply-add factor	derived
Throughput	1.638400e+12 ops/s	operations per window divided by 80 ns	derived
Average read-state power	4.181515e-01 W	sum of G_ij times mean squared read voltage	estimated
Energy per window	3.345212e-08 J	average read-state power times 80 ns	estimated
Energy per operation	2.552194e-13 J/op	energy per window divided by operations per window	estimated
Read-state energy efficiency	3.918198 TOPS/W	throughput divided by average read-state power	estimated
